The EU co-funded Asi@Connect project provides a dedicated regional high capacity and high quality internet network, Trans Eurasia Information Network (TEIN), for Research and Education (R&E) communities across Asia-Pacific and Europe, and leverages e-infrastructures developed for public service projects.

APAN-JP Backbone

Improved the resiliency with the addition of backup links

APAN-JP Backbone

PoP of APAN-JP

PoP of other R&E organizations

Main Path:

— APAN-JP (NICT JP-HK, HK-SG)

Backup Path:

— NII JP-SG

— ARENA-PAC, Guam-SG Consortium

— ARENA-PAC, AARNet

— KOREN

2023/3/15~7/14:

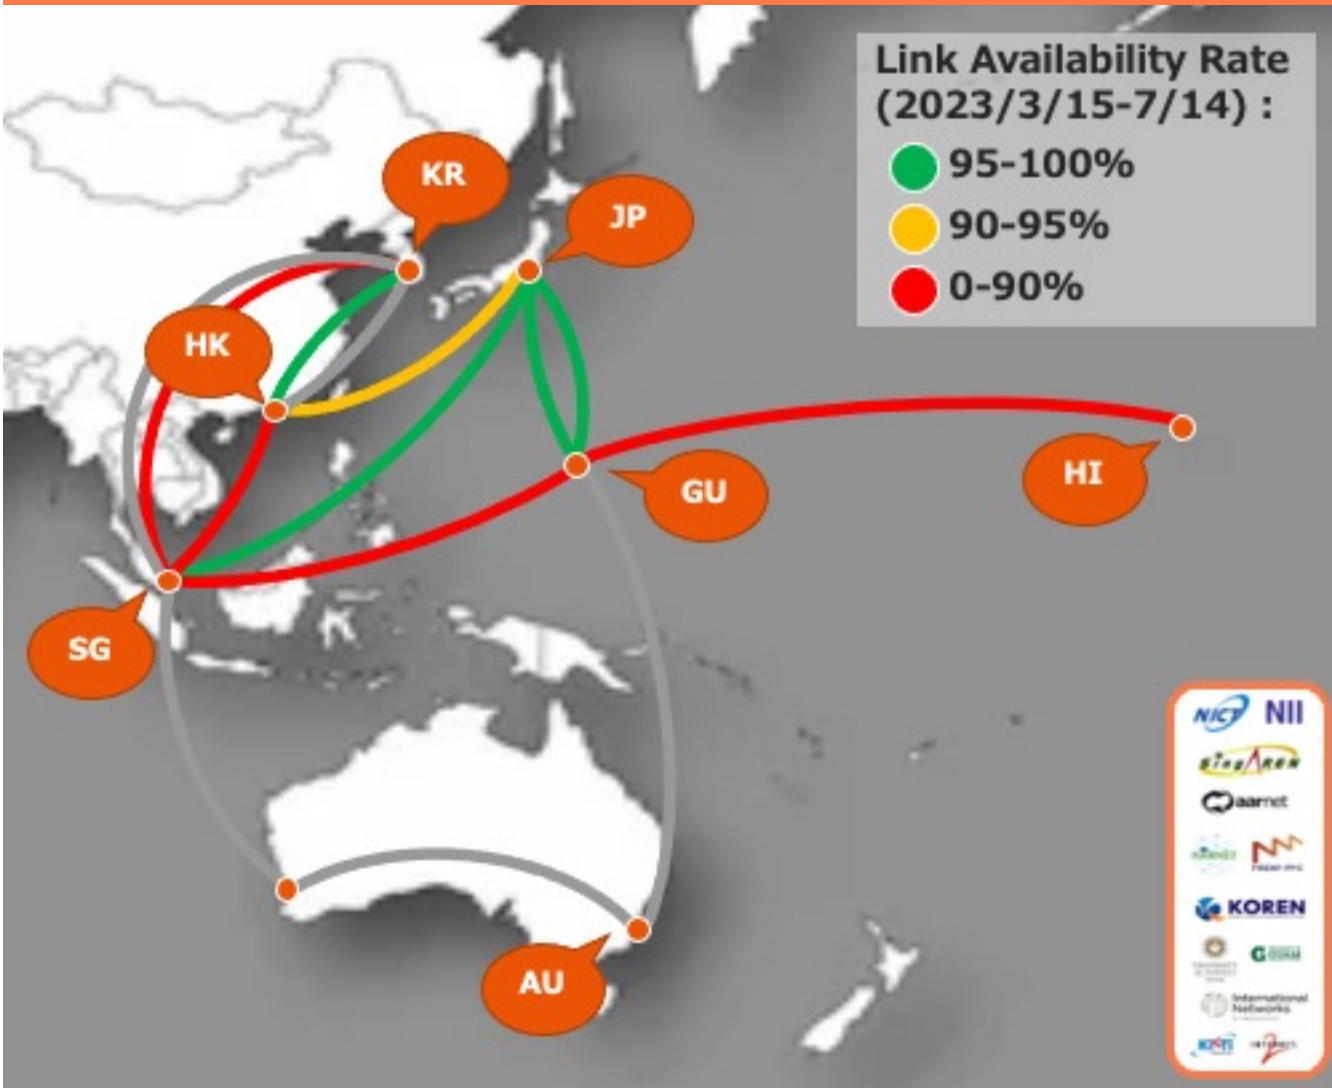

Although the APAN-JP main path link failed for a long time

Availability of APAN-JP Backbone >99.9%

➤ Thank you very much!

Interconnection of R&E International Circuits

Link Availability Rate

Submarine Cables:

- 99% of international communication is achieved by submarine cables
- more than 400 submarine cables in the world, over 100 cable breaks are reported each year

Causes of Interruption:

- Earthquake, Landslides caused by typhoons
- Fishing gear or ship anchors

Outage Characteristics:

- Fewer outages than land links
- Once interrupted, recovery takes time

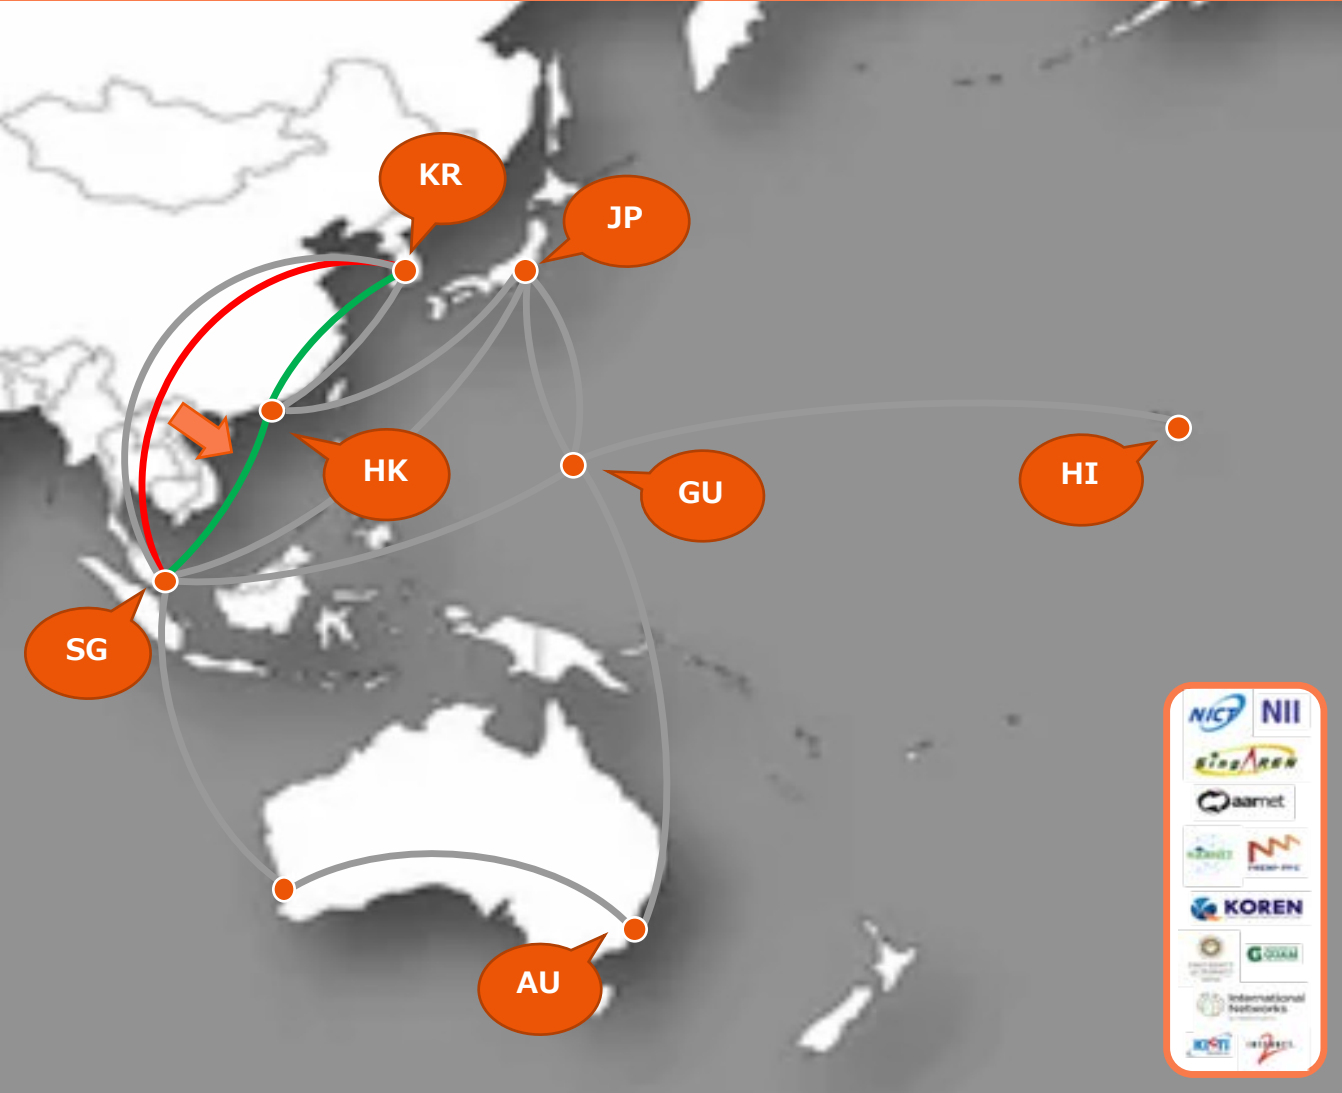

Difficult to maintain link availability above 95%

Mutual cooperation between organizations is very important

Interconnection of R&E International Circuits

Traffic detour case ①

Fault circuit:
KOREN KR-SG link down in April

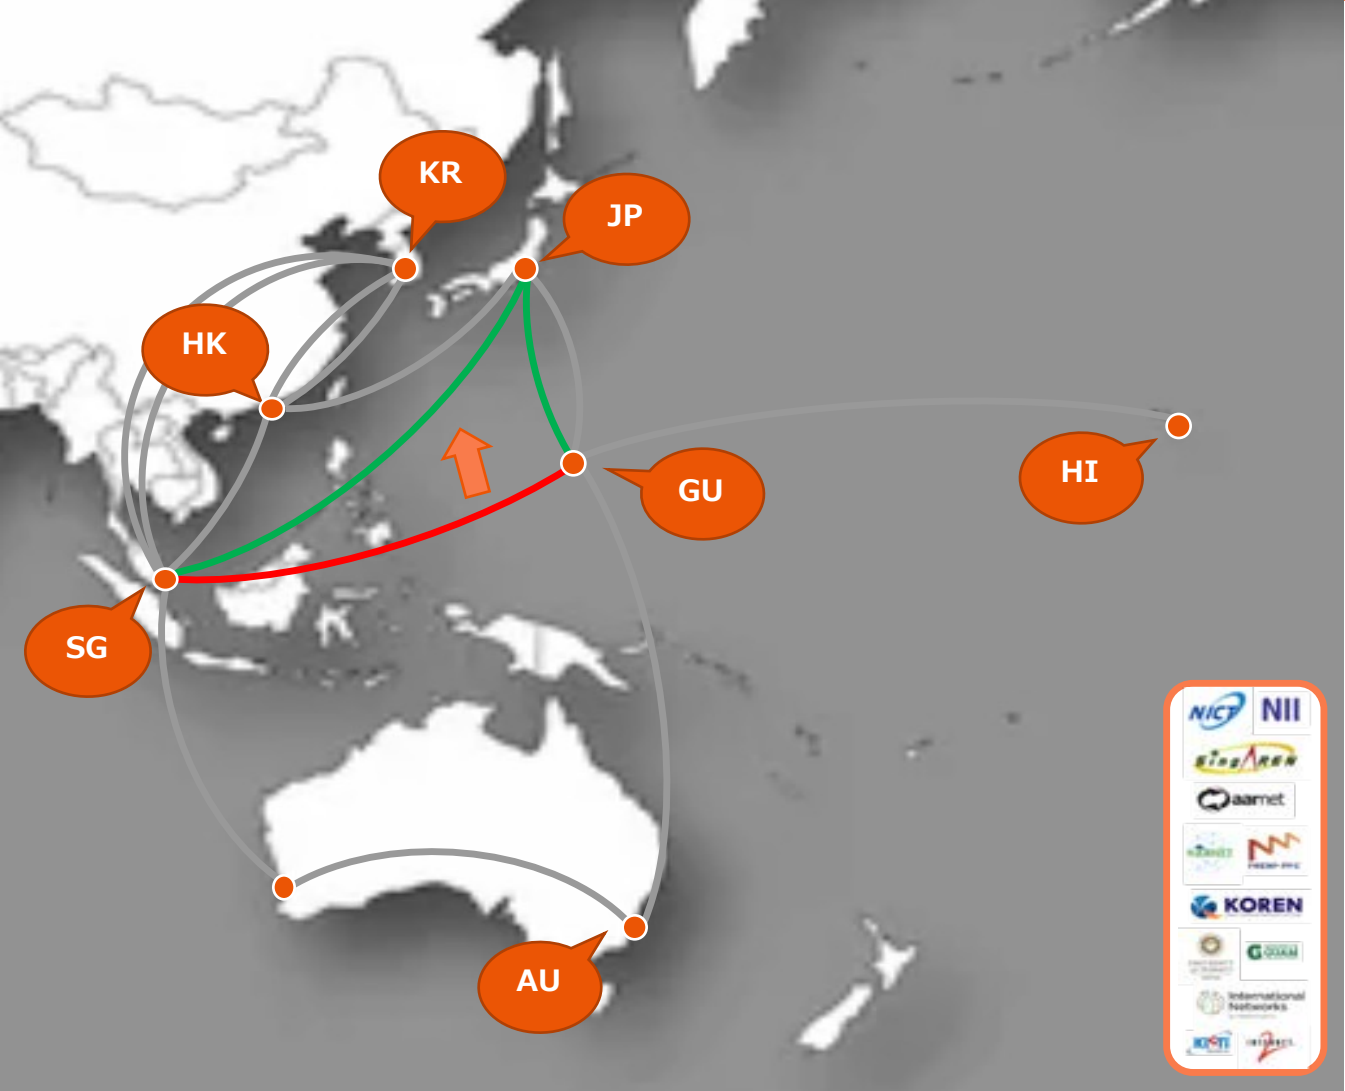

Detour route :
KOREN KR-HK link
NICT/SingAREN/JUCC HK-SG link

Interconnection of R&E International Circuits

Traffic detour case ②

Fault circuit:
Guam-SG Consortium link down in May

Detour route :
NII JP-SG link
NII JP-GU link

Network Outages

- SG-Guam 100G
 - Outage from 29th Jun to 5th Aug 2022 (36 days) due to undersea cable break
- CAE-1 100G
 - Outage due to multi-link break at Marseille from 18th to 20th Oct 2022
 - No traffic was impacted due to backup links in place over the SG-HK-JP & SINET Trans-Siberian links
 - Bottom graph is from the SINET Netherlight Interface of the Trans-Siberian SINET link

Adding my thanks to REANNZ for supporting us through this challenging time! This very much demonstrates the high value of our long standing cooperation with all of our APONet partners!

Best,
g

Hi All

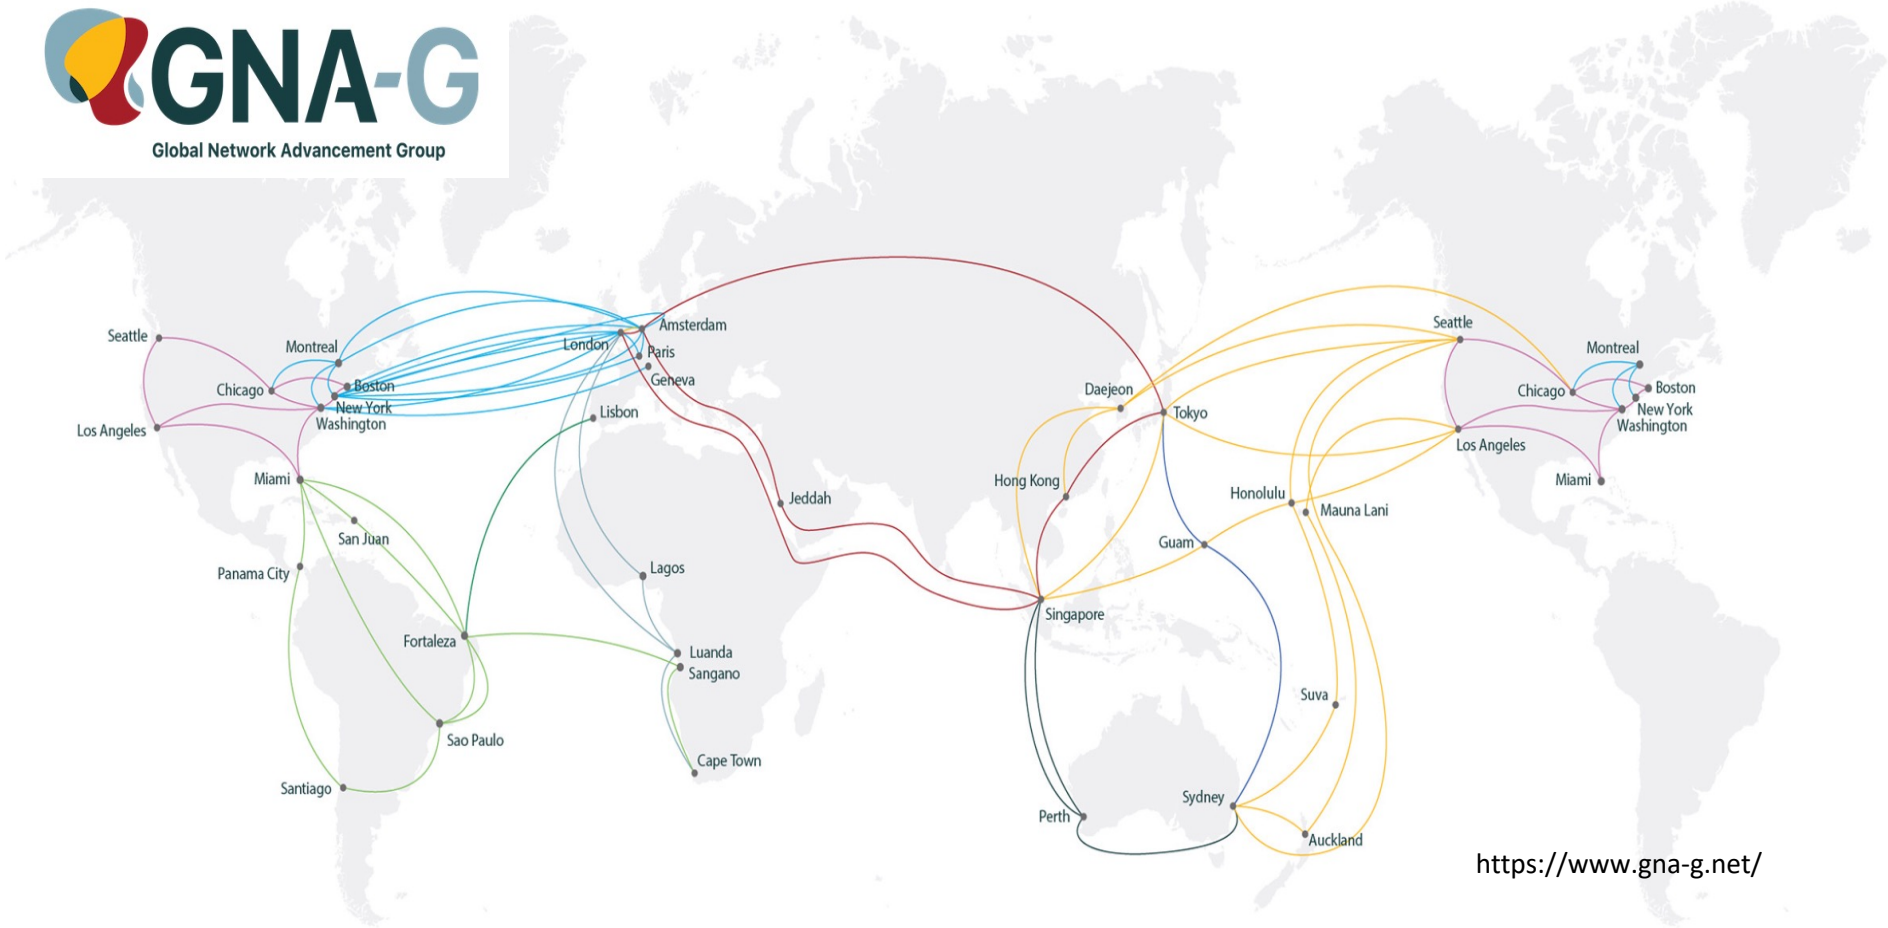

SEA-US is back up and running and provider has reported all repairs have been completed. Peering and VLANs that were not moved have been restored between the US West Coast - Hawaii - Guam. We plan to let this sit for a day or so and will begin migrating vlans that were moved back to their original paths.

Many many thanks to REANNZ for carrying traffic between Hawaii and GOREX during the prolonged outage.

Thanks!

Autogeneration of topology

Beyond connectivity

Singapore Upgrades HPC Infrastructure to Support Future Research Demands

❑ Upgrading Infrastructure

- From ASPIRE 1, AI Platform@NSCC, HTC1000 to ASPIRE 2A, and the benefits for Singapore R&D

❑ Connecting Singapore Research with the World

- Our links and connectivity in partnership with SingAREN

❑ Growing Local HPC Community & Int'l Collaboration

- e.g. Edge Supercomputing @ Singapore Hospitals and collaborations with overseas partners

Superconnected – Locally and Globally

LOCALLY

Ultra High-speed InfiniBand for Data Transfers

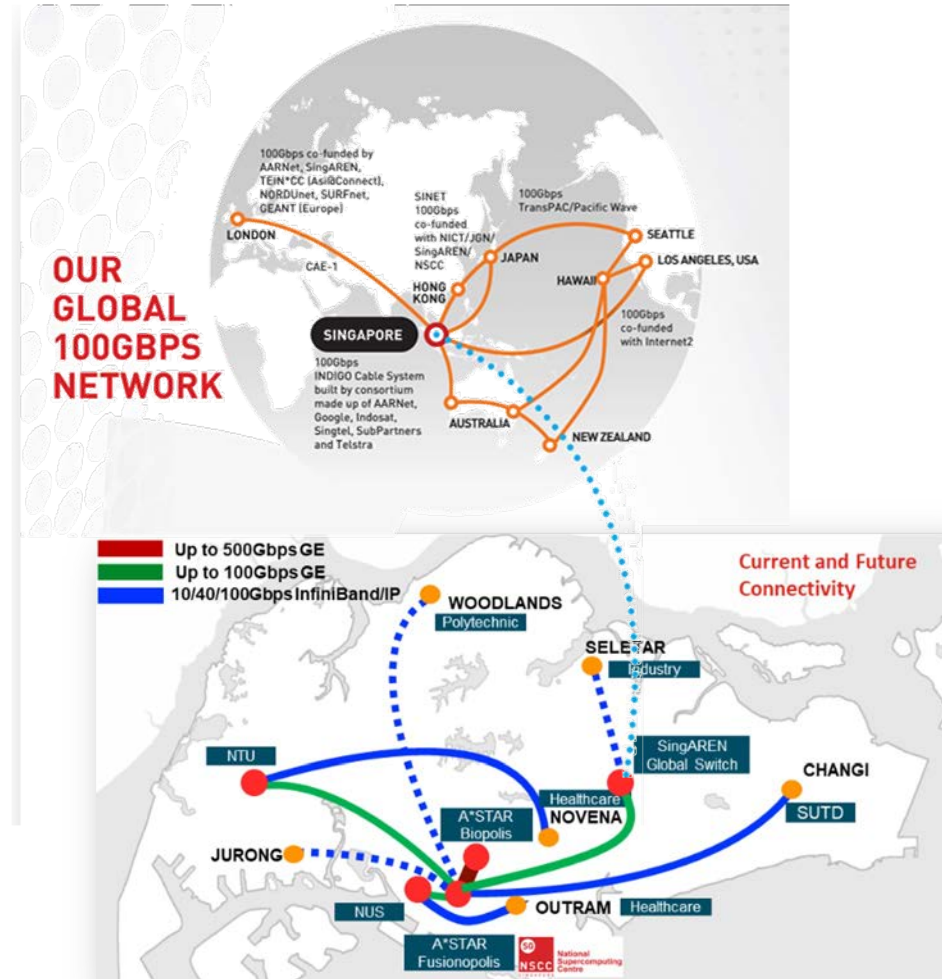

Leveraging long-haul InfiniBand switches, NSCC is able to deliver high-bandwidth and low-latency between different geographic locations in Singapore. Our connections are done in collaboration with the *Singapore Advanced Research and Education Network (SingAREN)* and *SingAREN-Lightwave Internet Exchange (SLIX)*. Researchers using ASPIRE1 at locations islandwide experience the same connectivity and speed as if they were at NSCC itself!

LOCALLY

Linking Singapore and the region with the rest of the world

Singapore as **Strategic HPC and Advanced Networking Hub** for the region.

To connect Singapore to **Global Research** and **Top HPC Centres** worldwide.

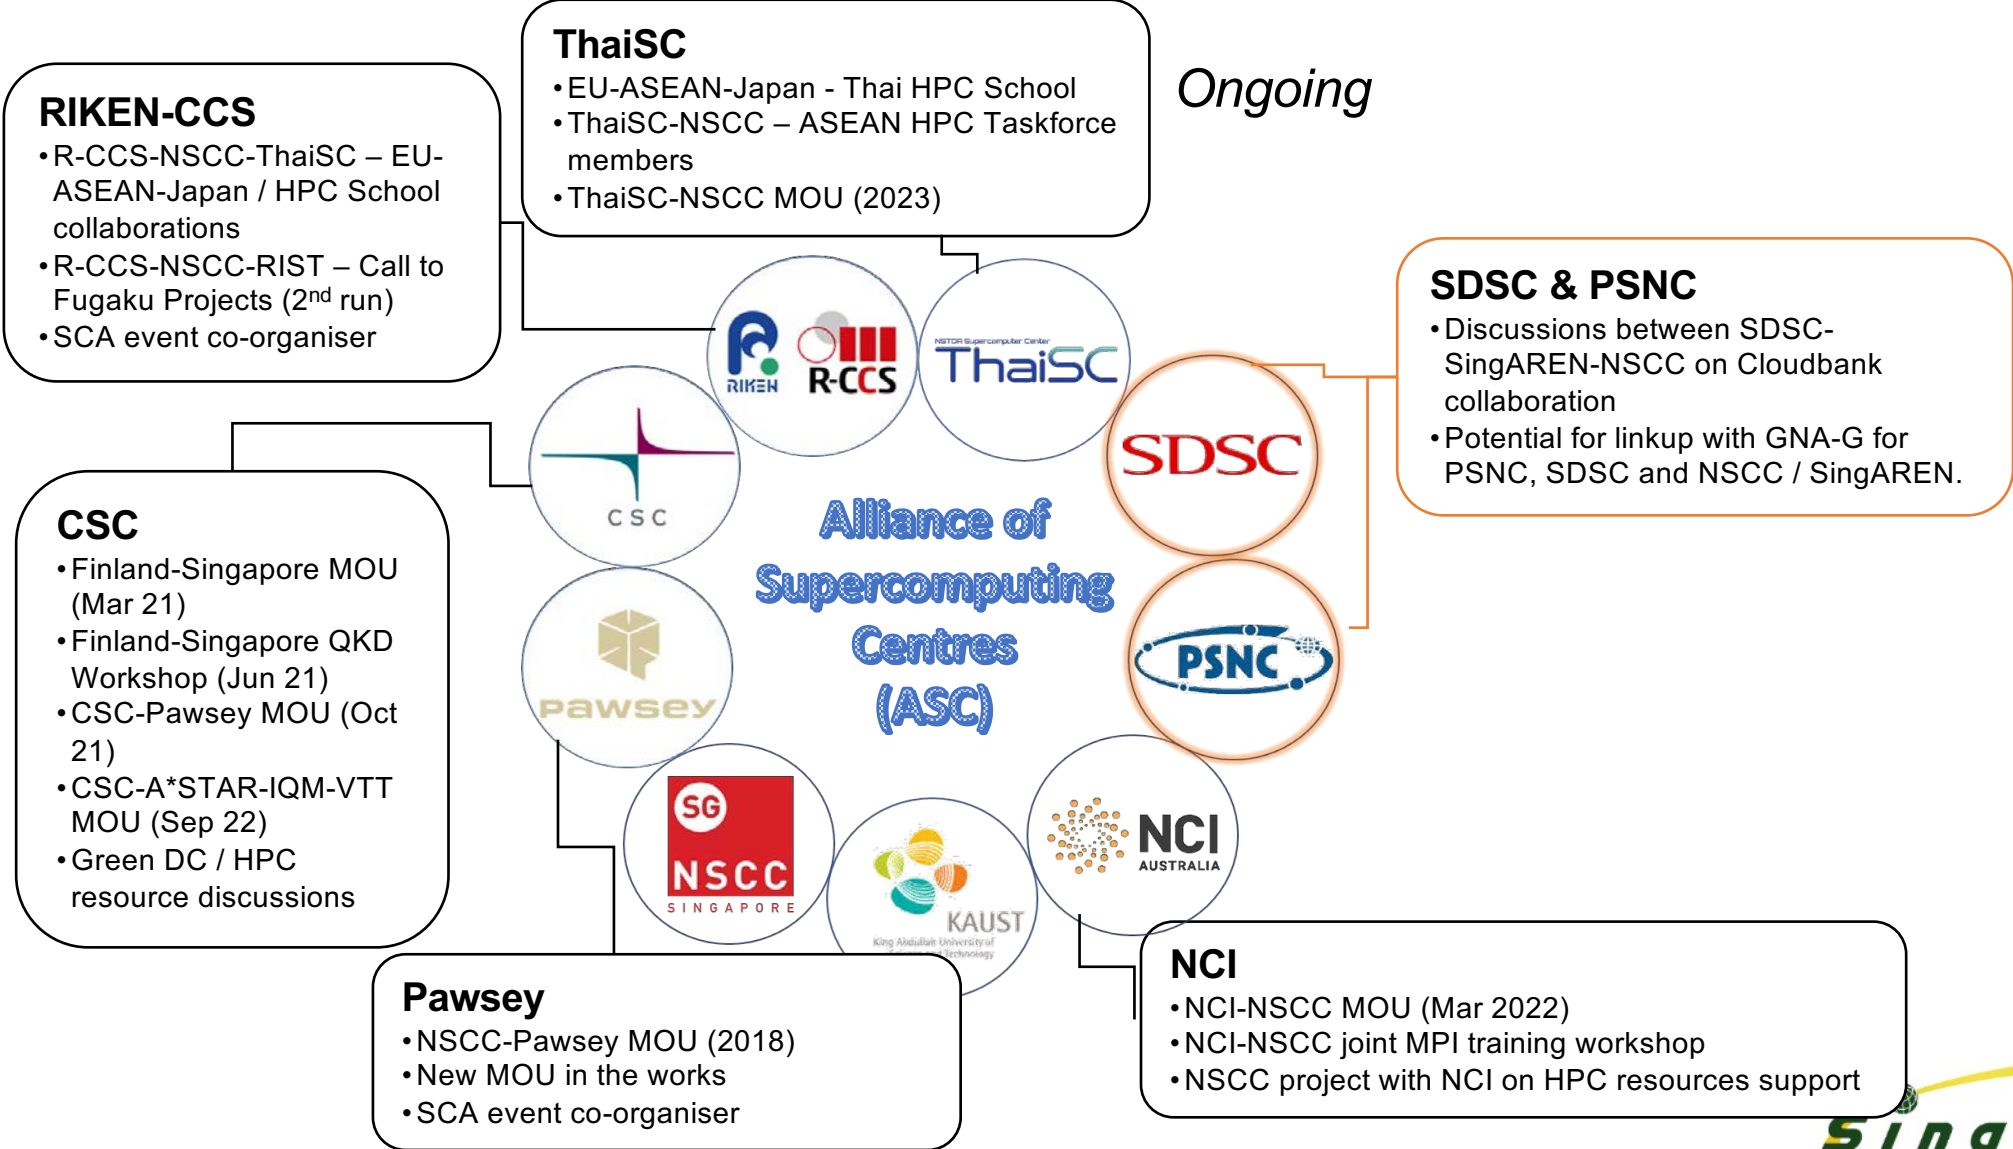

Key connections:

- Agency for Science, Technology and Research (A*STAR)
- National University of Singapore (NUS)
- Nanyang Technological University (NTU)
- Singapore University of Technology and Design (SUTD)

Leveraging International HPC Partnerships

Other support

- Supercomputing Demonstration
- Data Mover Challenge since 2019
- Remote Robot surgery between Japan and Singapore.
